Hello Lee

Great lead on ATR. We now have three tow truck operators (maybe 4) ready to proceed south almost immediately. Now we need to do a little bit of planning as to where we go from here.

Julie, our procurement specialist, is currently putting together contracts that will take care of compensation, travel, lodging, per diem and lability. We will also need to consider non disclosure agreements. I will need logistical support to get them to Lethbridge(?) and lodging. I can get government resources to help me out with this, but just need some operational perspective from you before I move forward. I have a telecon with Ottawa at 15:30 hrs, but that should only take 30 mins.

Cheers,

Peter
